About the property

Luma Biohacking Resort is an exclusive, next-generation investment complex in southern Bali, offering breathtaking ocean views surrounded by lush jungles. It stands as the island's first development to feature a professional wellness center and a premier longevity clinic by Elevate Labs. The project integrates premium residences with advanced infrastructure for body, mind, and energy restoration, creating a seamless, high-yield lifestyle ecosystem.

The innovative concept features an entire floor dedicated to anti-aging science, offering cryotherapy, hyperbaric chambers, and advanced stem cell therapies. Premium lifestyle amenities include a thermal complex, a panoramic sauna, Topgym fitness center, a yoga studio, dark retreat rooms, and a Health Food Bar.

Property management is handled by top-tier operators under strict international hospitality standards, mirroring major global brands. This ensures high occupancy and passive rental income for global investors within the rapidly expanding multi-billion-dollar biohacking market.
